

# WE DONORS

Register to see if you're the match that could save someone's life.

Children's Health<sup>SM</sup> is happy to partner with Be The Match<sup>®</sup>.

This international program connects patients with life-threatening blood cancers, blood disorders and other diseases with non-related registered members who are willing to donate healthy bone marrow or stem cells. Thousands of patients depend on the Be The Match Registry to find a genetically matched bone marrow donor in order to save their lives. Patients just like Ely.

Ely Eude Cruz attends Steven C. Foster Elementary, but she isn't your average third grader. Like other students, she loves math and science, but when it comes to recess, she can't play long. Having sickle cell disease makes it difficult for Ely's blood to circulate. That along with monthly hospital visits for blood transfusions, tests and other procedures, keep her from doing the things she loves most. The only thing that could change this would be a bone marrow transplant.

We encourage everyone 18 to 44 years old to attend the Be The Match Donor Registry Drive on February 15. Together, we can save more children, more daughters, sons, brothers, sisters, nieces, nephews, cousins and friends.

**DONOR REGISTRY DRIVE**  
**Monday, Feb. 15 • 9 a.m. to 7 p.m.**

**BE  THE MATCH<sup>®</sup>**
